MARGINALIA

The Oklahoma Daily, which has been running a series of articles on the centennial this year of the University of Oklahoma, reported recently on the university's mascots:

". . . The Schooner, which runs around the goal posts after an OU touchdown, is a wagon guided by the Ruf / Nek pep squad and drawn by the two white horses, Boomer and Sooner.

"The Ruf / Neks also promote school spirit by firing rifles at OU touchdowns."

That promotes school spirit *and* holds the scoring down.

■

A reader with the North Orange County Community College District sent us this clipping from *Western Photo Traveler:*

"Photographers seeking something unusual and photographically challenging might want to consider going underground to photograph the beautiful formations in caves. . . .

"I wrote to some sixty caves and only half replied."

They're notoriously bad letter writers.

■

From *SummitTalk*, a newsletter at Rice University about the "economic summit" in Texas this summer:

"Since media from all over the world will be coming to cover the Summit at Rice, *Thresher* editors-in-chief Sarah Leedy and Greg Kahn got the bright idea to invite their own international media peers from top universities and colleges around the world. . . .

" 'The budding journalists at the *Thresher* think this is a sensationalistic opportunity to see how the real world of journalism works,' says Jay Yates, who will be co-editor of the *Thresher* during the Summit."

Sounds more level-headed than *that*, to us.

■

Course listing in the catalogue at the Wesley Theological Seminary:

"1274. CONTEMPORARY ISSUES CONFRONTING THE CHURCH. Problematic issues in church life; precise content varies according to the faulty person assigned to class."

That figures.

■

From *Hilltopics*, a newsletter at Lindsey Wilson College:

"During open house, males are not allowed to use the restrooms in the women's dorm and females are not allowed to use the restrooms in the men's dorm. Escort your guest outside."

No comment.

Subhead in the New York *Times:*

TUTTORING PLAN PAY OFF

Why not try it and see? —C.G.

In Brief

President Steps Down Amid Accreditation Delay

NEW YORK—The president of Bernard M. Baruch College of the City University of New York announced his retirement last week on the heels of questions about the institution's accreditation.

Joel Segall has been president of Baruch for 13 years and will retire on August 31. In a statement, he said he was resigning "voluntarily without pressure from any source or authority—except my family."

According to a report in the New York *Times*, the Middle States Association of Colleges and Schools has deferred a decision to reaccredit Baruch because of the college's reportedly low rate of retaining minority students and its poor record of hiring minority professors and administrators. Neither the college nor the accrediting agency would confirm that report.

A spokesman for the college said Baruch was accredited and that the accreditation review was still under way. The spokesman also said the president had retired for personal reasons unrelated to the accreditation issue.

Police Use Tear Gas to Break Up Parties

EUGENE, ORE.—Two youths were arrested on felony riot charges near the University of Oregon after neighbors called the police to two block parties. The parties were attended by several hundred students, most of them from the University of Oregon and Lane Community College.

During the incidents, police dressed in riot gear fired about 10 canisters of tear gas into crowds of students. Police officials said later the action had been taken because some partygoers were pelting the police with bottles, and because the students were engaging in unlawful assembly.

No university organization sponsored the two events, which some reports characterized as "drinking parties," but up to two-thirds of the guests were said to be from the two institutions. The two men arrested, however, were not believed to be college students.

One week before the incidents, a committee of students, university officials, and police sent fliers to 7,300 students advising them how to conduct safe parties.

Law-School Students Stage National Protest

Students at at least 30 law schools boycotted classes, protested, and held teach-ins last week as part of the second Nationwide Law Student Strike.

The strike was part of an effort to push law schools to hire more female and minority professors. The students said they wanted to see new courses in the curriculum, such as ones dealing with legal issues confronting gay and lesbian, minority, and handicapped people.

Students involved in the strike, from Harvard to Wake Forest Universities to the University of California at Berkeley, said they were worried that women and minority-group law students had few mentors to turn to on law-school faculties.

Many law-school administrators said they shared their students' concerns and had made strides both in hiring more female and minority professors and in changing the curriculum.

The administrators, however, said that because law-school faculties typically are made up of many tenured professors, creating a diverse faculty is a slow process.

Closing of Student Paper Is Censorship, Editor Says

BEAVER FALLS, PA.—A student board at Geneva College has voted to shut down the campus newspaper for the rest of the spring semester because of an editorial that characterized the Roman Catholic faith as "pagan" and "non-Christian."

While Geneva is affiliated with the Reformed Presbyterian Church, one in five of its students is a Roman Catholic. The Student Publications Board, made up of eight students and two university officials, took action against the newspaper last month. It also announced plans to re-examine the newspaper's editorial policy.

The editorial, which appeared under the headline "Theology of the Pointy Hats," was written by

U. of Wisconsin Is Sued Over Anti-Harassment Policy

MILWAUKEE

A group of students and an instructor in the University of Wisconsin System are suing the Board of Regents, charging that its anti-harassment policy violates their right to freedom of speech.

The lawsuit, which was filed in U.S. District Court, challenges a policy that prohibits comments that demean individuals on the basis of their race, sex, or ethnic background. The Board of Regents instituted the policy on all of the system's 26 campuses last fall.

The lawsuit charges that the policy violates rights protected by the First Amendment of the Constitution because it is too broad, too vague, and applies only to students. The policy deters students from debating controversial issues, said Jeff Kassel, a lawyer for the students.

Patricia Hodulik, a lawyer for the university system, said the policy protects freedom of speech and does not apply to classroom discussions, student writings, or theatrical productions.

The suit was filed by lawyers recruited by the state chapter of the American Civil Liberties Union on behalf of seven students from the university's Milwaukee campus, two from Madison, one instructor at the Green Bay campus, and a student newspaper.

—JULIE L. NICKLIN

Both Sides Claim Partial Victory in Judge's Ruling on Mercer U.

ATLANTA

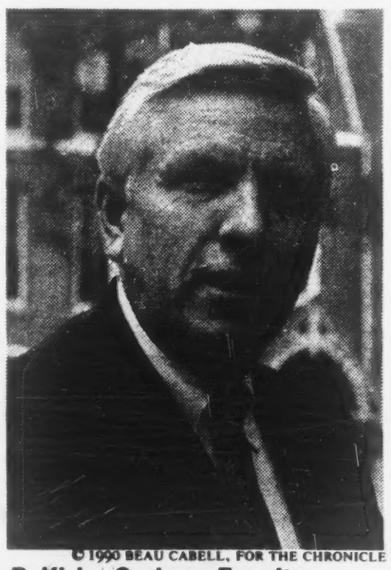
Mercer University officials and the professors and students who sued them have claimed partial victories in their legal battle over the planned closing of the College of Arts and Sciences on the institution's campus here.

Both sides said they expected to appeal an order by Superior Court Judge Carol W. Hunstein. Judge Hunstein refused to stop Mercer's Board of Trustees from closing the college here on June 30. Students and professors had sued Mercer separately last year to keep the college open.

Two other Mercer colleges on the Atlanta campus were not affected by the ruling. The university's main campus is in Macon, about 70 miles away.

Judge Hunstein also refused to restrict Mercer's use of several million dollars in endowment funds that faculty members here claimed had been set aside specifically for the college in Atlanta.

However, the judge upheld an earlier jury decision that the trustees had acted in "bad faith" and had breached contracts made with students and faculty members at the Atlanta college.



© 1990 BEAU CABELL, FOR THE CHRONICLE

R. Kirby Godsey: Faculty members have been picketing his office since January to protest his administration.

Mercer President R. Kirby Godsey called the points the judge ruled on "the central issues" in the case. "The trustees and administration of Mercer are pleased that the central issues of the case have been resolved in the university's favor," he said in a statement.

Mr. Godsey, reportedly, has not been as pleased about the climate on the campus in Macon, where his office is located. Dozens of faculty members have been holding hourly vigils every day since January to protest his administration.

Some professors, who blame Mr. Godsey for the university's financial crisis, said they planned to continue picketing until the president resigns.

In late 1988, Mr. Godsey first revealed to Mercer's trustees that the university had been carrying a deficit, which eventually reached nearly $12-million, as well as several million dollars in short-term debt. A spokeswoman for Mercer said the president still enjoyed the support of the trustees and had no plans to resign.

Appeals Expected

The split decision in the lawsuit, both parties said, means they will probably appeal the case. Mercer's general counsel, Corinne Houpt, said she believed the outcome of the case could set legal precedents in higher-education law.

The plaintiffs charged that Mercer's trustees had decided to close the college to use its endowment to cover millions of dollars in debts and deficits incurred at the Macon campus.

The Atlanta students and professors charged that Mercer officials had violated the faculty handbook by failing to consult the faculty before closing the college. The plaintiffs also charged that Mercer had broken its contracts with professors, for their jobs, and with students, for their education.

Mercer officials denied that they had decided to shut down the college in Atlanta for financial reasons. But they said the money from the college here would help cover debts in Macon.

University officials disputed the claim that they were obliged to consult with professors before deciding to close the Atlanta college.

The rulings were in response to the class-action suits filed by the professors and students. However, Judge Hunstein ordered that individuals who are part of either class and who seek damages from Mercer must now file separate complaints with the court.

More Colleges Offer Credit to Adults for What They Have Accomplished

Continued From Preceding Page
couraged by having to take beginning-level courses.

"If a person comes in and says, 'I'm a computer analyst, I need to move into a 300-level course in the computer area,' and I say to them, 'Well, that's too bad. I'd like you to start back at Cobol and Fortran,' I think that is a waste of time and energy," says Jacqueline E. Johnson, coordinator of prior-learning programs at the University of Maryland's University College. "You just throw another barrier in front of them, when in fact they have already gained that learning."

College officials say learning that takes place off the campus can be just as valuable as what takes place in the classroom.

"An individual who sits and reads and contemplates Plato in a personal study isn't really any different from a person who reads it in the library after it's been assigned," says David O. Justice, dean of DePaul's School for New Learning.

'Not a Giveaway'

Those who work with older students say the portfolio programs are rigorous. "This is not a giveaway, and it is not an easy thing to do," says Maryland's Ms. Johnson. She says students' portfolios can be hundreds of pages long. "People have this vision that when the students come to us and ask us for credit, that we're giving them credit for just the experience," says Ms. Johnson. "They do not realize that these portfolios are evaluated by faculty who are teaching in the field."

Ms. Johnson and others say faculty members who are critical of the programs probably do not realize how sharp older students are. Says Debra A. Dagavarian, director of testing and assessment for the portfolio program at Thomas A. Edison State College: "If any of these stodgy, narrow-minded people—these professors who say if you didn't learn it in my class, you didn't learn it—only heard some of these people speak, I think it would really just blow their minds."

Critics of the plans acknowledge that older students may have gained a lot through life's experiences. But they say colleges should not extend credit for learning they had nothing to do with.

"The degree is supposed to signify some level of attainment, some fraction of which, it now turns out, has nothing to do with the place awarding the degree," says Chester E. Finn, Jr., a professor of education and public policy at Vanderbilt University.

Mr. Finn believes colleges are simply using the adult programs as marketing tools. "Colleges are awfully hungry for students and will bend over backwards to persuade people that coming there is an easy thing to do," says Mr. Finn. "It's like saying, 'We'll give you three semester credits just for being a grown-up.' "

'The Shores of Ordinary Life'

Others say nothing can replace the interplay between professors and students that goes on in classrooms, and they worry that students who get credit without taking courses are missing out.

"The very special thing about college is that it asks you to think about a set of phenomena that go beyond your own experience, and requires reflection that is deeper than what we undertake in navigating the shores of ordinary life," says Stephen H. Balch, president and executive director of the National Association of Scholars. The group, which represents more than 1,000 faculty members, administrators, and graduate students, is devoted to bolstering intellectual standards in higher education.

Some professors worry that because they do not study the theories behind certain concepts, students who participate in portfolio programs will end up believing that what they have surmised about life is correct, even when it isn't.

'Series of Wrong Judgments'

Joseph M. Horn, associate dean of liberal arts at the University of Texas at Austin, says he learned while studying to be a psychologist that many of the things he had come to believe about his father's alcoholism were wrong.

"The experience of growing up with an alcoholic led me to a whole series of wrong judgments," he says.

"I agree that many older people have missed out and are very appropriate for college," Mr. Horn says. "But they should have the same tasks to complete that younger people have to complete. Just because they're older doesn't mean they should have fewer requirements." ■

Engineering Consortium Aims to Increase U.S. Students' Understanding of Japan

About 70 engineering students from 11 colleges and universities will spend next summer as interns working for Japanese companies or for American companies with branches in Japan.

The 11 institutions formed a consortium called the Engineering Alliance for Global Education to increase the number of engineering students who understand Japan and Japanese industry, said Barbara D. Ito, director of the program and director of East Asian Studies at the Rose-Hulman Institute of Technology. Rose-Hulman is one of the institutions participating in the program.

The students who travel to Japan will have just completed their senior years. Those who want to participate must apply to the consortium and write an essay telling why they want to take part.

A $145,000 grant from the National Science Foundation will pay for an orientation session aimed at helping the interns learn about Japanese language and culture.

1988 Enrollment of All Races Hit Record Levels

Continued From Page A1

students rose 3.6 per cent, to 10,283,000.

- Enrollment of black, non-Hispanic students increased 4.4 per cent, to 1,130,000.
- Hispanic enrollment climbed 10 per cent, to 680,000.
- Enrollment of Asians and Pacific Islanders jumped 10.9 per cent, to 497,000.
- The number of American Indians and Alaskan natives enrolled in college rose 3.3 per cent, to 93,000.
- Enrollment of foreign students—non-resident aliens studying in the United States on a temporary basis—rose 4.6 per cent, to 361,000.

The department's National Center for Education Statistics surveys all U.S. colleges and universities every two years on the racial and ethnic characteristics of students. The statistics cover only the 50 states and the District of Columbia, and exclude Puerto Rico and other territories.

"The last thing I want to happen is for people to say, 'Hey, folks, the problem is over; let's get back to business as usual.' "

The number of minority-group students rose 34.4 per cent from 1978 to 1988 largely because of substantial gains in the ranks of Hispanic and Asian students, according to the report. Over the 10-year period, Asian enrollment climbed 111.5 per cent, and Hispanic enrollment rose 63.1 per cent. Over the same period, the number of American Indian students increased 19.2 per cent, while the number of black students rose just 7.2 per cent.

Mixed Progress for Blacks

The figures indicate mixed progress in the enrollment of black students, a subject of much concern among college officials, policy makers, and the public.

Over all, the 1988 enrollment of black students surpassed the 1980 high of 1,107,000 by some 23,000, but the increased attendance of women accounted for that growth. In 1988, 687,000 black women were enrolled in college, compared with 643,000 in 1980. Enrollment of black men stood at 443,000 in 1988, down from the peak of 464,000 recorded in 1980. However, from 1986 to 1988, enrollment of black men edged up 1.6 per cent. Over the same two years, enrollment of black women rose 6.3 per cent.

Commenting on the report, Reginald Wilson, a senior scholar at the American Council on Education, said the figures indicated little progress toward the goal of equal educational opportunity. "We can't celebrate any of the enrollment figures we've seen in higher education," he said. Even with the gains, minority-group students continue to be underrepresented on college campuses, he said.

"The last thing I want to happen is for people to say, 'Hey, folks, the problem is over; let's get back to business as usual,' " Mr. Wilson added.

Population and Enrollment Up

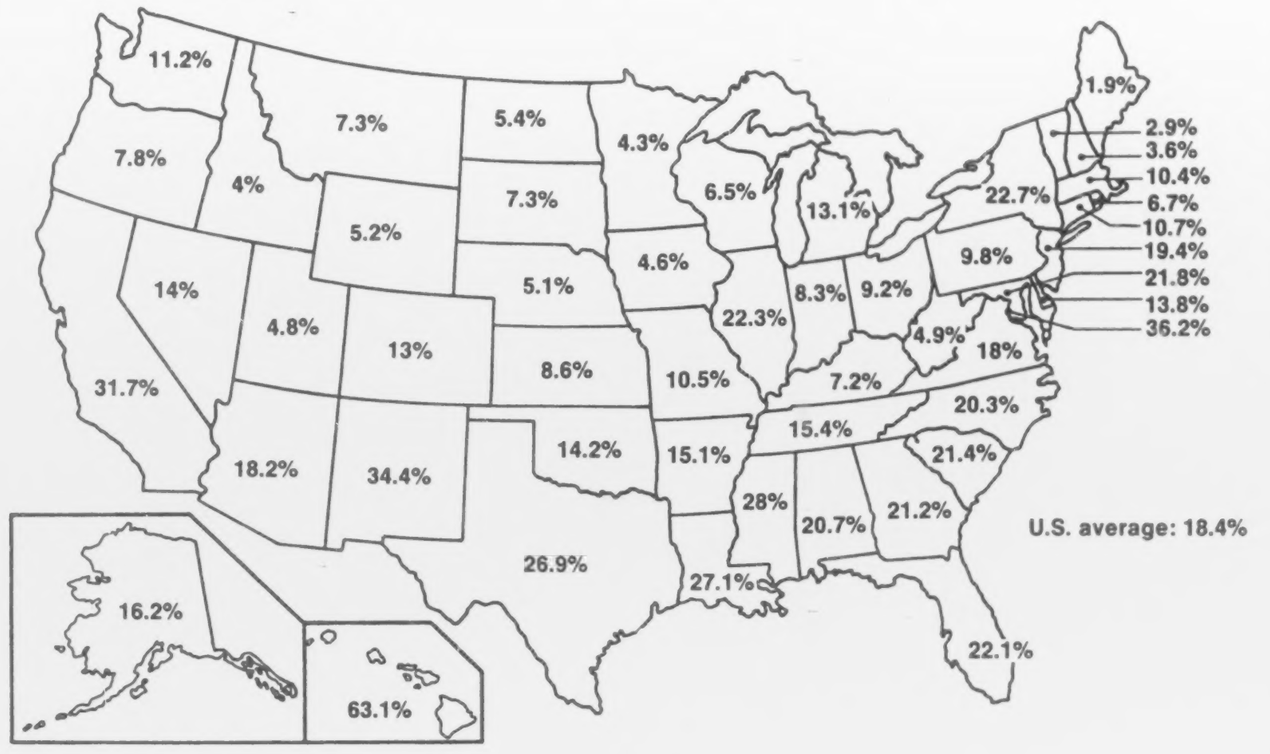
Antonio R. Rigual, president of the Hispanic Association of Colleges and Universities, said he was pleased that Hispanic enrollment was up, but added that the increase was largely a result of the substantial growth in the Hispanic population over the last decade. Hispanic students are far less likely than whites to graduate from high school, he said, and the Hispanics who do earn high-school degrees are less likely than white students to enroll in college. "The increase in enrollment is important, but there's a lot of work to be done," said Mr. Rigual.

In 1988, the national college-participation rate of high-school graduates who were 18 to 24 years old stood at 37.3 per cent, up slightly from the 1987 level of 36.4 per cent, according to the Education Department report. By race, the 1988 college-going rate was 38.7 per cent for white young adults, 28 per cent for blacks, and 30.9 per cent for Hispanics. Figures are not available on the college-going rates of Asians and American Indians.

White and minority-group students continue to have different enrollment patterns, with minority students more likely than white students to attend public two-year colleges, according to the government report. In 1988, 34.1 per cent of white students attended such institutions, compared with 54.6 per cent of Hispanic students, 51.6 per cent of American Indian students, 39.4 per cent of Asian students, and 38.3 per cent of black students.

The Department of Education plans to release its 1988 enrollment report later this spring. To purchase a computer tape of the survey data, contact the Department of Education's Information Technology Branch at 555 New Jersey Avenue, N.W. Washington 20208; (202) 357-6528. ■

State-by-State Enrollment by Race in 1988



The map shows the proportion of enrollments in each state comprising American Indian, Asian, black, and Hispanic students.

	Total	American Indian	Asian	Black	Hispanic	White	Foreign

'HUGE FIASCO POTENTIAL'

Scientists Angered by White House's Refusal to Invite Them to Global-Warming Meeting

By DAVID L. WHEELER

WASHINGTON

Scientists and science-policy scholars say they have been shut out of a White House conference on global warming to be held here this week.

The international meeting, the "White House Conference on Science and Economic Research Related to Global Change," has been advertised by the Bush Administration as evidence that it is serious about examining the threat of global warming.

But Alan S. Miller, director of the University of Maryland's Center for Global Change, said the conference has "huge fiasco potential."

Mr. Miller said he knew no one actually doing research on climate change who had been invited to the meeting or who had been permitted to attend it. Without scientists and economists present, he said, he failed to see how the meeting could have much credibility with the representatives of foreign countries who will be present.

No Schedule or Agenda Available

Planning for the conference also appears to be disorganized. A week before the conference was to begin, the White House had yet to release to representatives of the 17 participating countries a formal agenda, a schedule, or a list of those attending the meeting.

The disorganization and the lack of a theme for the conference disappointed those planning to attend. "We would have liked a little more specificity," said Bert

Faculty Job Market Slowly Improving, Evidence Indicates

More people in Ph.D. programs; employment listings multiply

By CAROLYN J. MOONEY

The faculty job market appears to be improving—not in spectacular leaps and bounds, but slowly and in increments.

That's the conclusion reached by associations that represent academic disciplines, by administrators who oversee faculty hiring, and by some graduate students seeking campus jobs.

Faculty salaries average $41,650, up 6.1% in a year, the American Association of University Professors reports: A13.

But because much of the evidence is anecdotal, observers of faculty-hiring trends sound like politicians when asked these days about the job market for new professors.

"I'd say there's cautious optimism," says Judith Ginsberg, director of foreign-language programs for the Modern Language Association, which represents some 30,000 scholars in English and foreign languages. "We have seen things improve in the last few years, and we have seen them maintain."

'We Don't Want to Over-Encourage'

Nonetheless, Ms. Ginsberg is quick to add this caveat: "We don't want to over-encourage people and tell them there are going to be lots and lots of jobs."

Several recent studies have concluded that in the next decade, colleges and universities will have to replace a large number of professors. The studies are based on predictions anticipating a wave of faculty

Bush Aides Change Plan for Black-College Aid, Concentrate on Individual Institutions' Needs

By SCOTT JASCHIK

WASHINGTON

The White House's Initiative on Historically Black Colleges and Universities is now paying more attention to the needs and strengths of individual institutions, Bush Administration officials say.

The officials say they developed the new approach because previous federal efforts to help black colleges and universities assumed that the institutions were homogeneous, and as a result the efforts did not make the best use of the government's resources.

"People have wanted to paint all 117 institutions with the same brush," says Robert K. Goodwin, executive director of the White House initiative.

This week, black-college leaders will travel here for a meeting during which Mr. Goodwin and other officials will formally unveil the new strategy. Most advocates for black colleges say Mr. Goodwin is moving the program in the right direction,

Grim Anniversary Bears Down on China's Campuses, Students

Beijing's universities are deathly still and anti-terrorist troops are in the streets as the first anniversary of Tiananmen Square nears: Page A31.

New White-Student Unions on Some Campuses Are Sparking Outrage and Worry

By ROBIN WILSON

Angered by admissions and financial-aid policies that they say unfairly favor minority students, undergraduates on some campuses are forming white-student unions.

The students say they are tired of being excluded from internship and scholarship programs because they are white. And they say they resent the special steps colleges are taking to attract and retain minority students. Leaders of most of the white-student groups say they are not white supremacists. But at some institutions, students involved with the groups are linked with the Ku Klux Klan.

The white groups have sparked outrage on the campuses where they have come together. Students at some institutions have called the union members racists and have staged protests aimed at stopping them from meeting.

Reaction from administrators and facul-

Continued on Page A36

STEPHEN MORTON, THE GAINESVILLE SUN

Mark Wright (center), the founder of a white-student union at the U. of Florida, is confronted by a member of the campus's Coalition Against Bigotry.

MARGINALIA

From our very own "Bulletin Board" section, in an ad for California State University, San Marcos:

"Located 30 miles north of San Diego in one of the nation's most rapidly growing regions, the university is expected to grow at least 10,000 undergraduate and graduate students in the next ten years."

That's *one* way to solve the enrollment problem.

■

And from our "Government & Politics" section:

"Advisory boards of the Association of American Medical Colleges approved a statement on conflicts of interest that will probably be released later this month. The medical-college association's report will also contain skeletal guidelines."

Such as "The neck bone's connected to the head bone"?

■

New item in the University of Michigan *ResearchNews:*

"For the second year in a row, the *ResearchNews* has received an Award of Excellence in the Technical Publications Competition sponsored by the Southeastern Michigan Chapter of the Society for Technial Communicaitons (STC)."

It's enough to fluster *any*body.

■

Request in *CONews,* a publication of the College of Nursing at the University of North Dakota:

"New photos are needed at the College of Nursing display for the side show and for brochures. . . .

For the brochures, maybe—but for the side show? Sorry.

■

Letter sent to Berkshire Community College by Russell Sage College:

"In an effort to increase awareness of the Creative Arts in Therapy program that Russell Sage College offers, I have enclosed one of our posters and information sheet. . . .

"Our program often attacks transfer students and, because of that, I would be happy to visit your school, if feasible, to conduct an introductory session on the use of the creative arts in therapy and an overview of the program."

O.K., but no fighting.

■

Recruiting letter from the Benjamin N. Cardozo School of Law at Yeshiva University:

"The abundance of highly developed clinics, the excellence and theoretical turn of the faculty, a commitment to a humanistic view of law—these are just a few of the attributes that have contributed to Cardozo's growing reputation. Cardozo has developed, particularly, a reputation as a hospital place for older students, and those changing careers."

Sign us up as an outpatient. —C.G.

In Brief

Pulitzer Prizes Go to 4 in Academe

NEW YORK—Four people with ties to colleges and universities were among the 22 winners of this year's Pulitzer Prizes, announced last week:

- For poetry, Charles Simic, a professor of English at the University of New Hampshire, for *The World Doesn't End.* The book was published by Harcourt Brace Jovanovich.
- For biography, Sebastian de Grazia, a retired professor of political philosophy at Rutgers University for *Machiavelli in Hell,* published by Princeton University Press.
- For music, Mel Powell, a professor of music composition at the California Institute of Arts, for "Duplicates for Two Pianos and Orchestra."
- For drama, August Wilson, a resident playwright at the Yale School of Drama, for "The Piano Lesson."

President's Office Bombed at Wesleyan U.

MIDDLETOWN, CONN.—The office of the president of Wesleyan University was damaged by fire after gasoline bombs were hurled through the window. The attack occurred at 4 a.m. No one was in the building, and no injuries were reported.

A security guard was walking to his car in the parking lot near the building when he heard glass breaking and saw flames in the office of William M. Chace, the president, according to a university spokesman. As the guard radioed the fire department, he saw a man running from the building. The guard was unable to catch the man, the spokesman said.

Three students in a nearby fraternity house reported seeing two men running from the scene.

The fire was put out quickly, but caused an estimated $60,000 in damage. Police and fire officials found the remains of two gasoline bombs that had been made with beer bottles.

An investigation is being conducted by the U.S. Bureau of Alcohol, Tobacco, and Firearms, in conjunction with the Middletown police and fire departments and the campus police.

29 ARRESTED IN M.I.T. PROTESTS

SEAN DOUGHERTY

CAMBRIDGE, MASS.

At least 27 students and 2 lecturers at the Massachusetts Institute of Technology were arrested last week (*above*) during three days of protests against M.I.T.'s investments in companies that do business in South Africa. The protests were sponsored by a campus group called the Coalition Against Apartheid.

The group has urged M.I.T. to cut its ties with companies doing business in South Africa. The group says the institute has about $240-million invested in such companies. The protesters were charged with trespassing, disturbing the peace, and assault and battery.

M.I.T.'s president, Paul E. Gray, defended the institute's decision to retain what he said amounted to $84-million in investments in companies that adhere to a code of conduct agreed to by U.S. businesses.

—COURTNEY LEATHERMAN

Abortion-Rights Groups Rally Across Country

Students at as many as 50 colleges held rallies, registered voters, and signed petitions this month in support of abortion rights as part of the National Day of Campus Pro-Choice Actions.

The events, spread over three days, were sponsored by two lobbying groups based in Washington, the National Abortion Rights Action League and the United States Student Association.

The activities ranged from a voter-registration rally at the University of California at Los Angeles, to dormitory canvasses for pro-choice voters at Grinnell College, to a petition drive at Cornell University for the Freedom of Choice Act.

The sponsoring groups said the events were the beginning of a seven-month drive to urge students who support abortion rights to register to vote.

Police, Students in Mêlée at Central Connecticut

NEW BRITAIN, CONN.—A mêlée broke out between campus police and nearly 200 students at Central Connecticut State University after a group of students was ordered to stop playing in a mud puddle.

The incident has led to a campus investigation to determine

Debate Over College Costs and Quality Masks Deeper Problems, Says Harvard's Bok

JOE WRINN

Derek Bok: Critics have been attacking higher education "more savagely ... than at any time in my memory."

CAMBRIDGE, MASS.

Harvard University's President Derek Bok, in response to widespread criticisms of higher education, has told his institution's Board of Overseers that much of the current debate about costs and quality masks deeper problems facing colleges.

In his annual report to the overseers, Mr. Bok sought to answer critics who he said had attacked colleges and universities "more savagely during the past ten years than at any time in my memory."

"Most of the charges are flawed because they ignore basic conflicts and contradictions in the demands society makes on universities," Mr. Bok said. "By ignoring the conflicts that underlie so many of the complaints, the debate will remain superficial, overlooking deeper problems that urgently need discussion."

Mr. Bok called for a more careful scrutiny of higher education, focusing on whether universities are serving society. "In particular, we need to step back and ask whether our universities are doing all they might to help the country address its most important problems—lagging competitiveness, poverty, inadequate public education, environmental hazards, and many more," he said.

Curriculum a Target

In his report, Mr. Bok noted that the curriculum had sparked the most bitter complaints. Some educators say colleges should pay more attention to ethics, racial awareness, and environmental problems, while others, especially conservative critics, argue that the failure to require the study of history and cultural traditions of Western civilization is "symptomatic of a broader decay of standards among the faculty and a general laxity and permissiveness on American campuses today."

Yet, Mr. Bok said, proponents of the latter point of view would be among the first to applaud the existence of a competitive, decentralized system of higher education.

"When educators disagree this strongly about the curriculum, the differences are typically so subjective and value-laden that no one can prove convincingly that only one answer is correct . . .," he said. "It is unrealistic and inconsistent to support a decentralized form of organization while also criticizing higher education for refusing to adopt a single preferred curriculum. One cannot have it both ways."

'In' Box

Stanford University's president, Donald Kennedy, has joined the ranks of those who think teaching is undervalued.

In a speech this month, Mr. Kennedy gave his vision of Stanford two decades from now. He noted that while teaching and research were both important at Stanford, "the relative weight has shifted over time, as the relatively new term 'research university' suggests."

"It is time for us to reaffirm that education—that is, teaching in all its forms—is the primary task, and that our society will judge us in the long run on how well we do it."

Mr. Kennedy noted that faculty members at his institution could buy out teaching time to concentrate on research, that too many courses are taught by temporary faculty members who are unappreciated and undercompensated, and that junior professors who have strong teaching records "fail at the tenure line too often." He also lamented the lack of discussion about curricular or pedagogical issues, and the lack of attention paid to advising.

Mr. Kennedy and academic officials at Stanford are working on a strategy to elevate the status of teaching.

Lest anyone fear that Stanford wants to be known as a teaching rather than a research institution, Mr. Kennedy assured the campus that the university could be superb at both.

■

Don't count on it, say some skeptics of recent talk about improving the status of teaching.

As an associate professor of English at the University of Texas at Austin said at a recent awards ceremony, "teaching excellence and a dollar will get you a cup of coffee at this university."

Kate Frost, one of two faculty members who received the Student Association's annual teaching-excellence awards this month, says she's fed up with what she sees as the university's lack of commitment to undergraduate teaching. She plans to leave the university as soon as she can find another job.

The Student Association had asked Ms. Frost to deliver a hypothetical "last lecture," as though she were about to leave and was looking back on her experiences. "That's closer to the truth than you know," she quipped in a speech to students.

Ms. Frost, a tenured associate professor who has received university teaching awards in four out of the last six years, criticized the university for making deep cuts in its writing program and for valuing research above teaching.

In her speech, she urged students to "get off your duffs and take back your university." Ms. Frost told them they should demand smaller classes, greater incentives for good teaching, and more courses taught by faculty members rather than by graduate students.

She received a standing ovation.

Shortage of Workers With Math Training Is Foreseen by 2000

Report says it is vital that women, minorities be attracted to the field

By CAROLYN J. MOONEY

The nation will face a serious shortage of scientists, engineers, teachers, and other mathematically trained workers by 2000 unless steps are taken quickly to revitalize mathematics education, a report by the National Research Council warns.

A decade from now, the demand for academic and non-academic employees who need mathematics training will be 36 per cent higher than it was in 1986, and nearly twice as high as the growth in overall employment, the report warns. Yet the traditional college-age population—and the pool of white male students that currently supplies most scientists and engineers—is expected to shrink by 1995, it says. Encouraging more women and minority-group members to study mathematics is vital, it says.

Part of 3-Year Project

The 119-page report, a statistical profile called "A Challenge of Numbers: People in the Mathematical Sciences," was prepared by the research council's Committee on the Mathematical Sciences in the Year 2000. It is one element of a three-year project aimed at revitalizing mathematics at colleges and universities. Two forthcoming reports will focus on the mathematics curriculum and support services for mathematics departments. Together, the reports will form the basis of a final report, slated for release late this year, that will make specific recommendations on improving mathematics education.

The latest report discusses the reasons for the decline in interest in mathematics. Among the explanations are a fluctuating employment market in the 1970's and 1980's, huge enrollments in introductory and remedial courses that have placed a heavy demand on faculty members and contributed to a static curriculum, a drop in research money for mathematics re-

Average Faculty Salary Reaches $41,650, Up 6.1% in a Year, AAUP Survey Finds

Professorial pay increase surpasses inflation for ninth straight time

By JEAN EVANGELAUF

WASHINGTON

The average college professor is earning $41,650 this academic year, up 6.1 per cent over last year, according to the report of an annual survey that the American Association of University Professors will release this week.

The figures mark the ninth year in a row in which faculty salaries rose faster than the rate of inflation, which the association estimates at 4.9 per cent so far this academic year.

By contrast, the average pay of college administrators rose only 4.5 per cent this year, the second time in three years that the increase did not keep pace with inflation, according to a survey conducted by the College and University Personnel Association.

"If the country is going to respond to the projected shortage of faculty, one pivotal place to begin is with the compensation of today's faculty."

In a statement, Hirschel Kasper, chairman of the A.A.U.P. committee that wrote the faculty-salary report, warned that "underpaying faculty today" could discourage students from pursuing careers in academe.

"If the country is going to respond to the projected shortage of faculty in the next five years, one pivotal place to begin is with the compensation of today's faculty," said Mr. Kasper, who is a professor of economics at Oberlin College.

Pay by Academic Rank

By academic rank, the A.A.U.P. reported the following average salaries and one-year increases for faculty members at all types of institution:

- Full professor—$53,540, up 6.3 per cent.
- Associate professor—$39,590, up 6.3 per cent.
- Assistant professor—$32,970, up 6.3 per cent.
- Instructor—$24,890, up 5.4 per cent.

When adjusted for inflation as measured by the Consumer Price Index, the average salary rose 1.1 per cent, the same adjusted rate of increase as last year's.

2,100 Institutions Reported

The figures are based on reports from more than 2,100 public and private colleges and universities and cover all full-time members of the instructional staff, excluding those in medical schools. The salaries are adjusted to a standard nine-month work year.

The statistics were compiled by Maryse Eymonerie Associates, a research company in Hilton Head, S.C.

The study shows that by type of institution, salaries this year are highest at doctorate-granting public and private universities, where they average $47,080. The average pay of professors at comprehensive institutions is $40,010, while that at two-year colleges is $33,950 and that at baccalaureate colleges is $33,400.

By sector, faculty members at private, independent institutions continue to have the highest earnings, with an average salary for all ranks combined of $45,080, the A.A.U.P. report says. The average pay for professors at private, church-related institutions is $34,910, while the average professor at a public institution earns $41,920.

The average pay of "continuing" faculty members—those who taught at the same institution both this year and last year—rose 7.3 per cent, according to the salary report.

The salary gap between men and women persists, with women earning less than men at every rank, according to the report. Based on a sample of 30,000 professors at 40 four-year colleges, the salaries of men

Teacher-Training Reformers Back Creation of a New Kind of Educational Institution

By BEVERLY T. WATKINS

If the reform-minded Holmes Group prevails, tomorrow's schoolteachers will receive much of their preparation in a new kind of educational institution called a "professional-development school."

According to a report scheduled to be released this week by the consortium of research universities, such institutions would be created by universities and public schools in partnership. Faculty members and schoolteachers would work together there to train future teachers and to conduct applied research on teaching and learning.

Aiming at 'the Long Haul'

The professional-development schools, which would be formed from existing institutions, would "work on the problems of teaching over the long haul—as long as several generations of teachers," says the report, which will be debated by a panel of teacher educators this week in Boston at the annual meeting of the American Educational Research Association.

"In the past, schools of education have mass-produced clinical experience for student teachers under highly variable conditions of supervision," says Richard F. Elmore, co-chairman of the project that produced the report. "Student teachers have just gone out into the world and worked with supervising teachers, some excellent and some not."

With professional-development schools, he says, "student teachers will be in an institutional setting where the focus is constantly on the relationship between the systematic knowledge of teaching and learning on one hand and practice on the other."

When it comes to research, says Mr. Elmore, a professor of educational administration at Michigan State University, "the university's posture toward the schools is pretty hit-or-miss. It depends on the strength and research interests of individual faculty members."

He says the professional-development schools will provide "a powerful way" to attract faculty members who can pursue their own research interests and concentrate on improving the schools at the same time.

97 Colleges in Consortium

The report, "Tomorrow's Schools," is the product of a two-year effort by the Holmes Group, which comprises 97 public and private institutions dedicated to educational reform.

The concept of the professional-development school was introduced in 1986 in the consortium's organizing manifesto, "Tomorrow's Teachers." The model was refined by a group of 120 university and school administrators, faculty members,
